

Head of Development

Competitive salary + bonus + car

Location: West Yorkshire

With an approach characterised by innovative products, valued brands and exceptional customer service, Arch Timber Protection is a leading global supplier of preservative and fire retardant timber protection products and services, with key markets in the United Kingdom, Europe, the Middle East and Africa. They are also an integral part of Arch Chemicals, a worldwide organisation with more than 3000 employees and annual sales of over \$1.4 billion.

Reporting to the Technical Director, you will manage key new product development programmes for the timber division ensuring projects run smoothly and market requirements are both met and reflected in cost and technical specifications. This will involve you in intellectual property management, the identification of future needs, the leadership, motivation and training of a talented technical team and active participation in industry forums.

Proven experience in an R&D/Product Development setting must be combined with a degree level qualification in Chemistry or a wood science discipline. An accomplished manager of both people and projects, you must have the ability to communicate with a wide range of internal and external contacts which will be key to your success in this influential role.

McCOURT NEWTON
