Institut für Holzbiologie & Holztechnologie, Büsgenweg 4, D 37077 Göttingen

Post doc position available “Wood protection/ wood modification”

at the Institute of Wood Biology and Wood Technology, Georg-August University
Göttingen.

Function: permanent, starting with a 3 year contract

Date: from September 2007 (or later)

Payment/ salary: group 13TV-L

Area of research: Wood modification/ wood protection

Candidate should have a PhD in above area, furthermore research experience in wood anatomy/ microscopy

Background: One of the main focus areas of the research at the Institute of Wood Biology and Wood Technology in Göttingen is the modification of wood and wood composites with reactive chemicals and physical processes. Approx. 25 researchers perform fundamental research or try to implement several new technologies in industrial processes. The above position should strengthen the knowledge of the working group and support master- and PhD-students. Knowledge on chemical and anatomical wood cellwall processes are necessary.

Language: due to the high percentage of scientists from abroad, the working language within the institute is English. However, for social contacts and contacts to german master students, the candidate should be willing to learn the german language.

Further information: Prof. Dr. Holger Militz, Institute for Wood Biology and Wood Technology, Georg-August-University Göttingen, Büsgenweg 4, 37077 Göttingen, GERMANY
